## CAREER SUMMARY

**Experience** 3 years as a Jr. Developer at a local start-up company, 10+ years in a manufacturing leadership role  
**Languages** JS, React, Typescript, Vue, Node.JS, Express, CSS3, HTML5, MongoDB, Python, Angular  
**Tools** Git, GitHub, Webpack, npm, Jest, Photoshop, Illustrator, After-Effects, AutoCAD

## PROFESSIONAL EXPERIENCE

### Campfire Studios LLC

St. Louis, MO.

*Jr. Developer*

03/2013 – 09/2016

**Technologies:** C#, CSS3, JS, XCode, Angular

- Developed a mobile game for 10+ Midwest based hospitals named “Ivy’s House Hunt”, used to calm and educate children during I.V. injections and other painful procedures.
- Achieved a 15-20% decrease in time spent sedating patients within 1 year.
- Successfully met each sprint deadline, generating 30% of the company’s revenue for that year.
- Designed styles guides and wrote in-house CSS libraries for 3 other products.

### Sika Greenstreak

St. Louis, MO.

*Fabrication Supervisor*

02/2009 – 05/2021

- Oversaw 100% of the fabrication process of custom-built construction materials.
- Reviewed and modified AutoCAD models for specialized orders.
- Maintained constant communication with my team and engineers to ensure compliance with the client specification while maintaining a 98% product acceptance rate.

## PROJECTS

### SockChat

02/2022 - 03/2022

**Technologies:** JS, React, Express, Socket.io, MongoDB, Mongoose

- Built a real-time chat application with optional data persistence.
- My goal with this was to gain experience keeping real-time data in sync across the UI, DB, and server instances.
- Demo: [ssockchat.herokuapp.com/](http://ssockchat.herokuapp.com/)

### Invoice Tracker

12/2021 – 01/2022

**Technologies:** JS, React, CSS Modules

- Implemented an intuitive UI for creating and managing Invoices.
- Developed for a small local water-well drilling business, saving them 20+ hours per month since moving from paper invoices.
- Demo: [n-voice.netlify.app/](http://n-voice.netlify.app/)

### Personal Blog

11/2021 – 12/2021

**Technologies:** JS, Express, MongoDB, Mongoose, PassportJS, PUG, Bootstrap

- Minimalist blogging site for personal use in developing public communication skills.
- Utilized PUG to become familiar working with templating engines
- Demo: [damp-reef-82599.herokuapp.com/](http://damp-reef-82599.herokuapp.com/)

### Craps Game

10/2021 – 12/2021

**Technologies:** JS, React, MaterialUI

- Full featured recreation of the casino game ‘Craps’.
- Built using as few dependencies as needed in order to focus solely on React functionality.
- Demo: [craps-game.herokuapp.com/](http://craps-game.herokuapp.com/)

## EDUCATION

### The Odin Project

06/2021 - 01/2022

Completed the Full Stack Developer curriculum focusing on: JS, React, Node, Express, REST API, A11y, Webpack, Git, MongoDB, Semantic HTML, OAuth, Writing Documentation, Test-Driven-Development
